

Autonomous AP for NetSuite

AppZen fully supports all of NetSuite’s native features, accommodating your business growth, expansion, acquisitions, and more, with AI purpose-built for finance teams that learns your unique AP processes and workflows.

Fully automated invoice processing

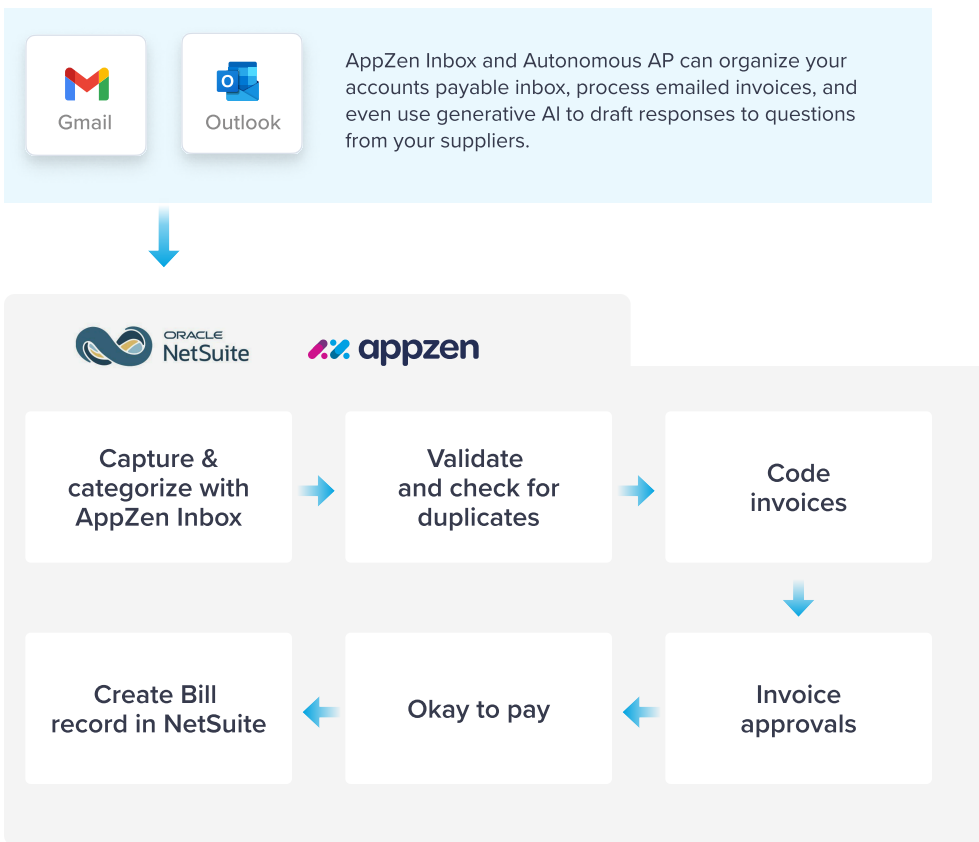

Captures data, matches POs, codes and approves invoices, and automatically syncs bill data to NetSuite

Automation starts at your inbox

Start processing invoices from your Microsoft Outlook or Gmail AP inbox; save hours drafting email replies

Scales with your business

Integrates in days and scales as you grow by learning from your feedback without IT resources or disruptions

The value of Autonomous AP

Gain efficiency

Reduce manual tasks and data entry to accelerate invoice processing.

Scale efficiently with AppZen Inbox

AI categorizes emails, processes invoices, and drafts replies to vendor inquiries for you.

Fastest time to value

Quick API integration in days with minimal user training needed.

Control & visibility

Gain real-time insights into invoices, spend patterns, and financial data.

Touchless invoice processing

Increase efficiency with AI-based pattern recognition and contextual learning.

Fraud prevention

Auto-detect duplicate invoices, anomalies, and fraudulent activities.

Communication & collaboration

Keep stakeholders informed and aligned on all invoices.

More supplier flexibility

Works with your EDI, P2P, portals, and AP inbox.

World-class support

We give you dedicated, expert assistance and best practices insights when needed.

AppZen AI is empowering over 1000 finance teams

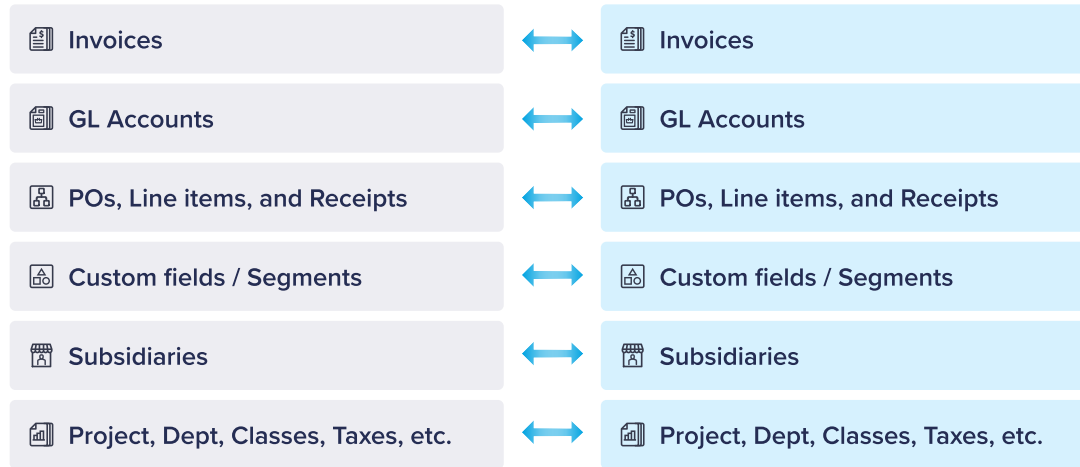

Extract more value from your NetSuite ERP

AppZen's AI-powered AP automation solution simplifies processes for companies of all sizes, increasing AP team efficiency without the cost.

Sync master lists

4-step integration

- 1. Install AppZen bundle**
Find the AppZen bundle in SuiteBundler and install
- 2. Assign AppZen role**
Add the AppZen role to a NetSuite user
- 3. Create access token**
Create a new token and obtain the Token ID and Token Secret
- 4. Connect to AppZen**
Add details in AppZen and sync Master List

Auto-create Bill in NetSuite

“Within three weeks of going live, AppZen picked the PO number out of our master data when it was not present on the invoice, solely based on the fact that a copier serial number was on the invoice, and it was also in the PO data. It came into [our ERP] and auto-posted without anybody ever touching it.”
