appzen

AppZen global e-invoicing

Autonomously capture, validate, and process electronic invoices with perfect accuracy

Future-proof your global e-invoicing operations with AI. Receive invoices electronically, navigate complex government mandates, validate country-specific requirements, and eliminate compliance penalties in over 40 countries.

Simplify compliance

Automatically update processes to meet evolving e-invoice mandates and regulations

Eliminate risk and penalties

Validate every invoice based on country-specific requirements for formats, taxes, and archiving needs

Confidently process invoices

Process across tax authorities and government portals with certified PEPPOL access point integration

Accelerate digital transformation

Modernize operations with intelligent automation. Turn complex e-invoicing tasks into efficient digital workflows and maintain complete spend visibility.
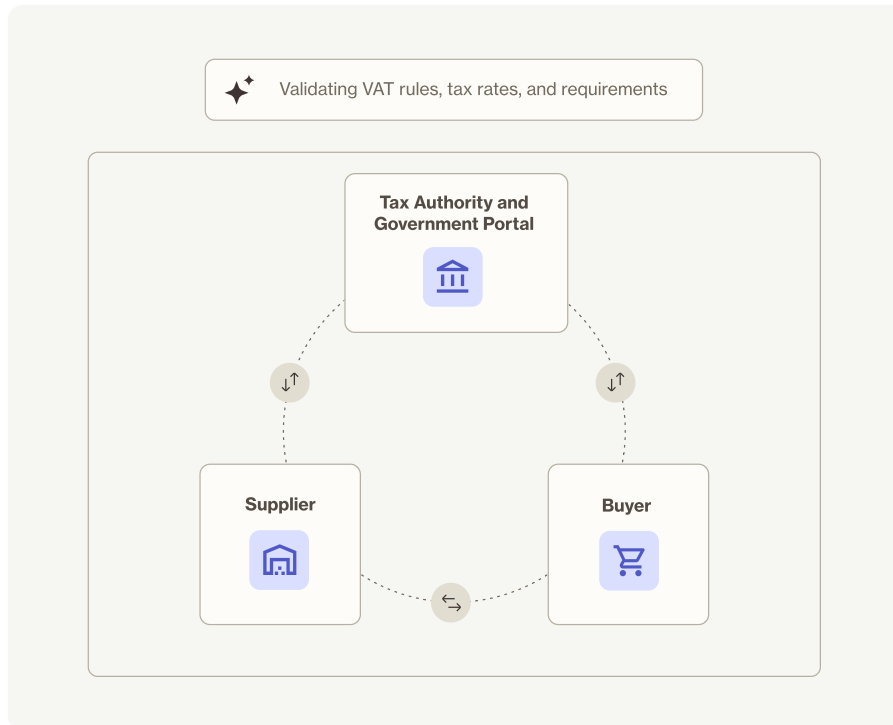

Key Capabilities

Process e-invoices in multiple formats to comply with local regulations

Automatically validate tax codes, mandatory fields, and digital signatures

Gain real-time visibility into compliance status and analytics

Store and archive according to local retention requirements

Build additional validation rules with country compliance packs pre-configured for Autonomous AP

Continue automated invoice processing from validation through OK-to-pay with Autonomous AP

Validating VAT rules, tax rates, and requirements

Tax Authority and Government Portal

EQUINIX   AIRBUS   GEORGETOWN UNIVERSITY   salesforce

Navigate varying e-invoicing mandates with confidence

Process invoices through any channel, anywhere

Continuous Transaction Control (CTC)

Tax authority validation (V-Flow)

PEPPOL Transmission

Streamline the validation process through the PEPPOL network and certified channels, ensuring compliance across countries such as Italy, Romania, and France.

Real-time tax verification (Y-flow)

IRN Portal Transmission
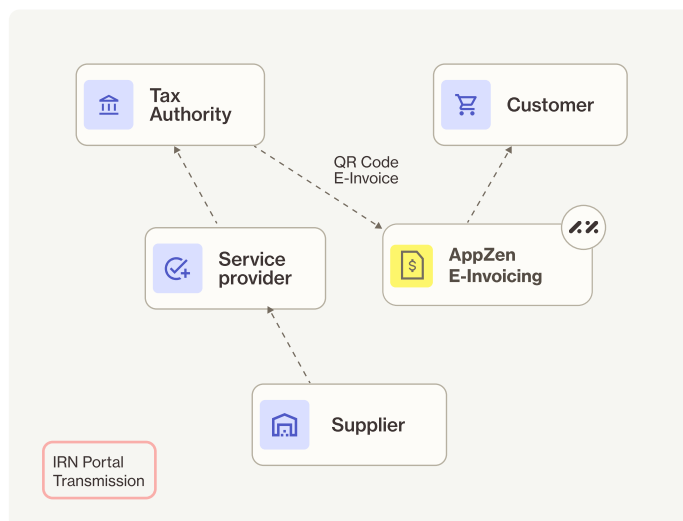

Automate the management of digital signatures, QR codes, and special anchoring requirements for countries like India.

Direct e-invoicing via email

Email Transmission
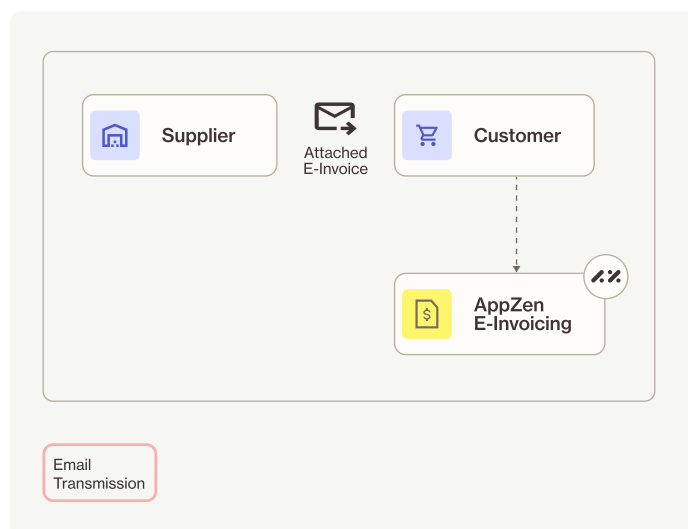

Support traditional email-based submissions in countries like Germany, for invoice formats such as ZUGFeRD and XRechnung.

> "AppZen's large customer base means they're electronically processing far more documents than we could ever handle internally - so we don't need to build something on our own. Their AI is learning from millions of documents across their customer network, giving it far more opportunities to learn than we could ever provide."
